Salt-Out!™

Solves Sodium Salt Problems

Significantly reduces soil sodium salt levels

Prevents uptake of salts by the plant roots

Rapid improvement of turf grass color

Programmed use of **Salt-Out!™** significantly reduces salt levels in the soil by displacing sodium salts that build up as a result of fertilizer applications; irrigating with reclaimed, well or pond water; and sodium salts deposited by ocean mist.

Salt-Out!™ coats plant roots protecting against salt damage and enhancing nutrient uptake which results in rapid improvement and stabilization of turf color.

Salt-Out!™ contains ingredients that sequester salts and renders them unavailable to the plant roots. It will prevent salt related diseases and browning of leaf tips and margins.

Salt-Out!™ also contains a surfactant to ensure proper soil penetration and even moisture distribution throughout the root zone.

For Golf Courses, Sports Fields, Sod Farms & Home Lawns

Treatment Program:

Initial applications: Apply 4 gallons per acre or 12 fl oz per 1000 ft².

Reapply at 6-8 fl oz per 1000 ft² every two weeks until plant conditions improve.

Maintenance use: Apply 6 -8 fl oz per 1000 ft² monthly.

Salt Out!™ may be sprayed on with a boom sprayer, hose end sprayer or, if necessary a back pack sprayer. A light syringe (1/8") of water after each application is required.

Tank mixing instructions:

Gradually add **Salt-Out!™** to the mixing tank while filling with water. Make sure that the mixture is **thoroughly agitated** (at least 5 minutes) to provide uniform dispersion (water encapsulation) throughout. For sprayer tank use, mix **Salt-Out!™** at a ratio of 40:1 water to product. Once in suspension it will remain in suspension.

Available in 5 gallon containers, 30 gallon drums and 55 gallon drums

US & International Patents Pending

Precautionary statements: No known environmental hazards. Non-hazardous to humans, animals and fish. Flush with water if product comes in contact with eyes. If large amount is ingested, drink plenty of water. Do not induce vomiting. It should pass through digestive system.
